It was called one of the most scenic stretches of closed down railroad in the country. When the Hiawatha Railroad was operating, the trains traversed through 10 tunnels and over 7 high trestles, covering a 10-mile route that crossed the rugged Bitterroot Mountains between Idaho and Montana. The ‘Route of the Hiawatha’ is small enough for the long I-90 Trail Park, or Taft Tunnel which burrows for 8777 ft (166 miles) under the Bitterroot Mountains at the state line.

Along your bike ride through the long St. Paul Pass, Taft Tunnel to your vehicle and the parking lot at the East Portal.

The Hiawatha Trail travels along the Loop Creek Canyon within the beautiful Bitterroot Mountains. This nationally acclaimed “Rail-to-Trail” path utilizes the abandoned Milwaukee Railroad grade between the historic old town site of Taft, MT and the North Park of the St. Joe River near Ross, ID.
